

Course Instructors

(Biographies from www.noigroup.com)

Sam Steinfeld **BSc, BMR (PT)**

Sam graduated in 1979 from the University of Manitoba School of Physiotherapy. He became a partner in the Sports Physiotherapy Centre in Winnipeg in 1983 where he continues to practice.

Currently a guest lecturer at the University of Manitoba School of Physiotherapy, teaching the Neurodynamics section of the curriculum, he is also the physiotherapy consultant to Canada's Royal Winnipeg Ballet.

Sam has assisted David Butler teaching NOI courses in Canada since 1997, and teaches NOI's *Mobilization of the Nervous System* 2 day course very successfully in tandem with Laurie Urban.

Laurie Urban **BA, BPT, (F) CAMT, Dip Sports Phys**

Laurie graduated from the University of Manitoba with a Diploma of Physiotherapy in 1977 and then in 1982 received his Bachelor of Physiotherapy. In 1982 he received his Diploma in Sports Physiotherapy from Sport Physiotherapy Canada and then his Advanced Diploma in Manipulative Therapy in 1991 from the Orthopaedic Division of the Canadian Physiotherapy Association.

Laurie is a partner at the Sports Physiotherapy Centre in the Pan Am Clinic in Winnipeg, Manitoba where he maintains a busy caseload and together with his two partners administers this large multidisciplinary practice.

(IAHS)
Hamilton, Ontario**

Course Description

From <http://noigroup.com/courses>

The MOTNS course offers a comprehensive introduction to the diagnosis and management of physical dysfunction of the nervous system, all within a clinical reasoning and pain sciences framework. There is plenty of practical work, some very up to date neurobiology and clinicians should be able to rapidly merge the material into all existing manual therapy frameworks.

MOTNS course objectives:

- Teach under a framework of the sciences of clinical reasoning and those related to pain, pain behaviours and evidence-based practice.
- Provide reviewed and updated knowledge of neuroanatomy, neurodynamics and pathobiology related to pain mechanics.
- Teach diagnostic skills in the examination and treatment of physical dysfunction of the nervous system.
- Provide an introduction to evidence-based pain management skills.

Pre-requisites:

- Appropriate qualifications and experience (refer to course host)

This course is open to:

- Registered medical practitioners and allied health professionals.

General Information

Tax receipts and course certificates will be distributed at the completion of the seminar.

Course Format: Hands on interactive session with some lecture format. Registrants are advised to dress appropriately and are encouraged to bring note-taking materials.

Registration Deadline April 20th, 2010.
